
A. NTDs excluding malaria: local clusters (LISA, FDR q<0·05)
Global Moran's I = 0·71
p<0·001 (9999 permutations)
High–High (48)
Low–Low (39)
High–Low (0)
Low–High (0)
Not significant (116)
B. Malaria: local clusters (LISA, FDR q<0·05)
Global Moran's I = 0·79
p<0·001 (9999 permutations)
High–High (42)
Low–Low (62)
High–Low (0)
Low–High (1)
Not significant (98)
C. Concentration curves by Socio-demographic Index
Cumulative share of age-standardised DALYs
